

# Search Powered Application For Your Enterprise

Streamlined Workflow

Alerts & Notifications

Multiple Primary Data Sources

Auto Complete

## SMARTSearch Services

OpenCrowd develops custom search powered applications for its clients. By enabling 'Search as a service' in your enterprise, new and existing applications can have instant access to a wide variety of structured and unstructured information.

### COMPLEX SEARCHES

Unify disparate data silos, perform complex searches against diverse data sources such as CRM, transaction systems, office documents... with a single query

### USER EXPERIENCE

Significantly improve user experience by providing capabilities like auto suggests, facets, proactive alerts, auto complete...

### SPEED

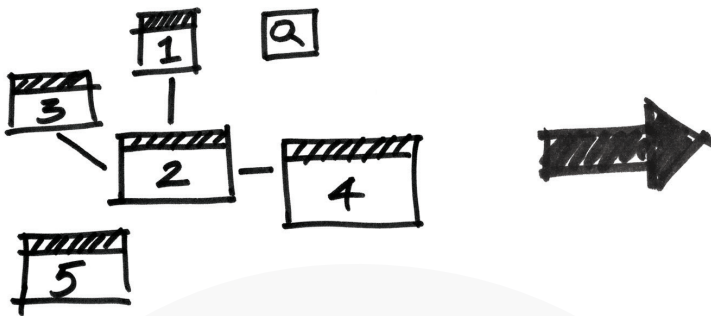

Retrieve information at an unprecedented speed using advanced index technologies

### INSIGHT

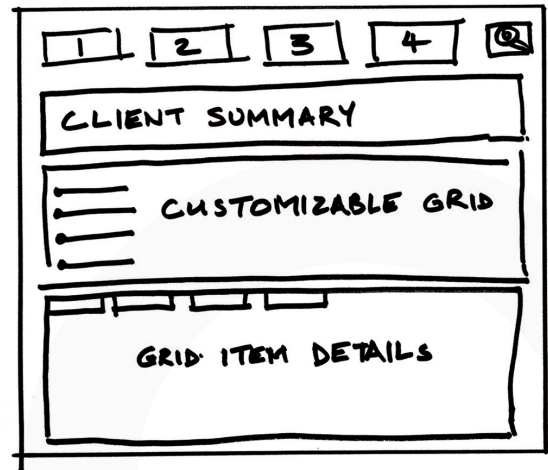

Find trends in large volumes of data and discover new insights faster through real time data analytics

# Simplifying Enterprise Experience

Multiple Applications  
Challenging Workflow

Simplified and Customizable  
Integrated Application

OpenCrowd is a design & technology services company that builds custom mobile and web solutions for clients. Our custom solutions range from 360 View Dashboards, Smart Search and Enterprise UI to Business Social applications.

## 360 VIEW DASHBOARD

OpenCrowd's approach for developing the next generation dashboard. This dashboard emphasizes 5 key capabilities a) Visualization; b) Analytics; c) SmartSearch; d) Collaboration and e) Mobile.

## SMART SEARCH

OpenCrowd develops custom applications powered by search. By enabling "Search-as-a-Service" in your enterprise, new and existing applications can have instant access to a wide variety of structured and unstructured information.

## BUSINESS SOCIAL

OpenCrowd builds online communities to connect people across geographies & organizational hierarchies. Features such as blog, chat, video and tagging capabilities enrich communication and collaboration.

## ENTERPRISE UI

OpenCrowd's design & EXT JS practice can help you build user-centric platforms. By matching user needs with common UX patterns, pre-existing and custom EXT JS widgets, we are able to create the most powerful, consistent and simplest user interfaces possible.
